# THUNDERBOLT ceasar

Introducing the Ceasar Thunderbolt, the largest from our X Class Range offers a level of versatility and comfort one would expect from a Ceasar, whilst still managing to keep the adrenalin pumping to give an exhilarating ride. Fully inflatable the boat rides on built-in hijackers, allowing it to plane quickly, minimizing the area in contact with the water thus enabling higher speeds using a smaller engine. The power to weight ratio offers amazing fuel efficiency. An incredibly stable craft at speeds, and rest due to it's catamaran design, the Ceasar Thunderbolt gives a softer re-entry, by absorbing the short chop. The catamaran design also allows the boat to change direction quickly and more precisely; cornering as if it were on rails with no leaning. Rated to take up to six people, the Ceasar Thunderbolt is perfectly suited as a fun family boat with its ample deck space allowing it to be utilised as a dive boat, fishing boat or ski boat. We tube the Ceasar Thunderbolt with the same high quality PVC as we do the Thundercat. Reassuringly safe, seaworthy, buoyant and stable. Whatever you are looking for, be it family fun or high speed performance, and whether you are a beginner or more experienced, there is the perfect inflatable for you within the Ceasar range.
